DETAILED ACTION

Response to Amendment

1. Claims 1, 3-12, 17, 19, and 20 have been amended. Claims 1-23 are pending.

Information Disclosure Statement

2. The information disclosure statement filed 09 May 2005 fails to comply with 37 CFR 1.98(a)(3) because the cited reference(s) do not include a date of publication. It has been placed in the application file, but the information referred to therein has not been considered.

Priority

3. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Claim Rejections - 35 USC § 112

Art Unit: 3735

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claims 20 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear as to whether the claimed invention is directed to a method or an apparatus. The claimed invention must be directed to statutory subject matter as defined in 35 U.S.C. 101.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Khuri et al, US 6,567,679 B1 ("Khuri").

Claims 1-23: Khuri teaches an apparatus and method for determining the presence or severity of ischemia (see col. 10, ll. 7-13), the apparatus comprising: a pH sensor for measuring intracompartmental pH, wherein the pH sensor is inserted into soft tissue, e.g. a muscle (see fig. 2, and col. 4, l. 57, to col. 5, l. 4), mounted on a catheter/cannula

Art Unit: 3735

(see fig. 2, and col. 4, l. 57, to col. 5, l. 4), and connected to a pH recorder ("microprocessor", see col. 8, l. 48).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The other patents cited in the PTO-892 teach subject matter related to the Applicant's claims. The Examiner suggests reviewing these patents before responding to the present Office Action.
